## EDUCATION

### URDANETA CITY UNIVERSITY

Bachelor of Science in Information Technology

Expected Graduation: June 25, 2026

Urdaneta City, Pangasinan

## PROFESSIONAL EXPERIENCE

### EASYCOM JAPAN PHILIPPINES INC.

Software Engineering Intern (On-the-Job Training)

February 2026 - Present

Makati City, Philippines

- Developing and maintaining modules for the enterprise Human Resource Information System (HRIS) across web and mobile platforms.
- Architecting interactive web interfaces using Angular, ensuring high performance, responsive layout, and structured state management.
- Building multi-platform mobile application modules using React Native (Expo) to facilitate cross-departmental operations and real-time data access.
- Collaborating with cross-functional development teams via GitHub to review code changes, manage software repositories, and track systemic versions.
- Participating in sprint cycles and technical alignment check-ins to deliver scalable and secure digital infrastructure.

## TECHNICAL PROJECTS

### HATAW BALUNGAO MULTI-PLATFORM TOURISM MANAGEMENT SYSTEM

2025 - 2026

Lead Full-Stack Developer | Academic Capstone Project (Municipality of Balungao)

- Designed and implemented a comprehensive cross-platform digital framework serving community and service administration.
- Engineered a robust, highly secure web administration dashboard and RESTful API using the Laravel backend framework.
- Developed the corresponding native-performing mobile ecosystem using Flutter, leveraging uniform state management for smooth user experience.
- Deployed cloud-based database pipelines and linked unified API endpoints to securely stream application telemetry.
- Managed the unified development cycle utilizing Git/GitHub for source control, system modularization, and version stability.
